Profile

I graduated with a Bachelor's degree in Software Engineering field from Celal Bayar University, where I focused on are AI, Spring Boot & Oracle back-end development, LTE/5G algorithm design, and Angular. During my internship at Innova, I developed Java-based web applications using Spring Security, set up CI/CD pipelines with GitHub Actions, containerized services with Docker, and integrated Apache Kafka for event-driven workflows. As a lab assistant at Andasis, I co-led hands-on network laboratories and guided students through core networking concepts. I also spearheaded a study on next-generation shortest-path algorithms, which I presented at the Manisa Celal Bayar Arge & İnovasyon Congress.

Professional Experience

02/2025 – 06/2025 Ankara, Turkey	Software Engineer Long Term Internship <i>INNOVA IT SOLUTIONS</i> 🔗 Projects: Lega, LegaLite Skills: Docker, Jira, Spring Framework, Spring Boot, Jpa, Angular, PL/SQL • Performed full-stack development on the Lega and Legalite projects using Spring Boot and Angular. • Resolved backend issues during the Spring → Spring Boot upgrade to ensure production stability. • Automated Legalite's CI with a single Docker Compose file and init scripts for default DB setup. • Built dynamic, parameter-driven JasperReports and optimized the underlying SQL. • Fixed form-validation and other errors in reusable Angular components. • Addressed bugs in the Lega package rollout—especially for TEB clients.
09/2024 – 01/2025 Manisa, Turkey	Network Lab-Assistant <i>ANDASIS ELEKTRONİK SANAYİ TİCARET A.Ş.</i> 🔗 Skills: LTE, SDN, D-ITG, ONOS, Mininet, Linux Projects: A Next Generation Shortest Path Algorithm: Comparing Network Topologies
07/2024 – 08/2024 Ankara, Turkey	Software Engineer Summer Internship <i>INNOVA IT SOLUTIONS</i> 🔗 Projects: Lega, LegaLite, Book Social Network Skills: Spring, Jpa, Spring-Auth, Angular Framework. • I started learning Spring Framework as a main programming web framework in this internship. • I developed a comprehensive backend for learning and practicing Spring Boot, Jpa, Authentication. • I took tasks in a Real-World project called Lega(A comprehensive Law web system for big scaled companies). • I developed my basic SQL and PL/SQL skills.

Education

09/2021 – 06/2025 Manisa, Turkey	Bachelor of Software Engineering <i>Manisa Celal Bayar University</i> 🔗	GPA: 3.76
-------------------------------------	---	------------------

Projects

Spring-Examples : [🔗](#)

This repository includes all java spring framework examples of my learning journey. Various of projects to learn new libs and some design pattern practices

Spring-grpc-ddd-hexagonal: [🔗](#)

Developing api with DDD and Hexagonal architecture with using Rest and gRPC.

Blog Web App: [🔗](#)

Introduced to RDMS and MVC library using ASP.NET [🔗](#) MVC, enhancing understanding of web application frameworks.

Authentication-Module-Spring-DDD: [🔗](#)

A portable authentication module implemented with hexagonal architecture and DDD principles for best practices and learning this approaches while writing authentication example.

Speaker-Recognition-With-ML: [↗](#)

A small example of speaker identifier with machine learning and serve to web with django.

Sb-apache-kafka: [↗](#)

Kafka examples with spring

Face-Emotion-Recognition-Detection-DL: [↗](#)

Developed a sophisticated deep learning model that leverages neural networks to classify and predict emotions from facial expressions in images. This project involved the entire pipeline from data preprocessing and augmentation to model training and validation, ensuring robust performance in real-time emotion recognition.

Skills

Spring Boot	Spring Jpa
Docker	Apache Kafka
Machine Learning and Deep Learning	Clean Architecture
LTE, 5G	Postgres, PL/SQL
Angular	DDD/Hexagonal

Publications

A Next Generation Shortest Path Algorithm: Comparing Network Topologies

Toy B.
Pages of my chapter **417 -427**. I did present my topic in Manisa Celal Bayar Innovation and Arge Congress. After this presentation i did write a book chapter for the congress book.

Organisations

09/2024 – 01/2025	SDxRG ↗
Manisa, Turkey	<i>Assigned Lab Assistant for Network Lab.</i>

Languages

English

Don't have official internation document yet.

Certificates

SQL (Basic) - HackerRank ↗ Level 1	Problem Solving (Basic) - HackerRank Level 1
Software Engineer Intern - HackerRank ↗	SQL(Intermediate) - HackerRank ↗ Level 2
